

# Users offer bounties on issues to attract developers' attention

The screenshot displays a bounty page for the 'asset-builder' project. At the top, the project name 'asset-builder' is highlighted with a blue box and labeled 'Project name'. Below it, a description reads 'assembles and orchestrates your dependencies so you can run them through your asset pipeline.' and a button says '★ Become a Bounty Hunter'. To the left, a circular profile picture of a lion is shown. Below the project name, two buttons labeled 'Closed' and 'Paid Out' are highlighted with a blue box and labeled 'Issue status'. To the left of these buttons is a thumbs-up icon and the text '0 likes'. Below the buttons, the text 'austinpray/asset-builder »' is followed by the issue title 'Remove `austinpray` paths from tests', which is highlighted with a blue box and labeled 'Issue title'. Below the issue title is a button labeled 'View in GitHub' with a GitHub icon, highlighted with a blue box and labeled 'GitHub issue link'. Below this, there are two tabs: 'Overview' and 'Backers (1)'. Below the tabs is a table with three columns: 'Backers', 'Amount', and 'Date'. The table has one row with the following data: 'austinpray' (highlighted with a blue box and labeled 'Backer name'), '\$5' (highlighted with a blue box and labeled 'Bounty value'), and 'Jul 29, 2015' (highlighted with a blue box and labeled 'Bounty creation date').
